

Sunday, May 20, 7:30 a.m.
Highline Park
21st and Chestnut St.
Philadelphia, PA

In two weeks Team MPS will represent the National MPS Society as they ride for rare disease research. It's not too late to support our team as we reach for our fundraising goal of \$100,000! This event offers an incredible match on all donations up to \$50,000. Now is the best time to donate! Don't miss this special opportunity to double your donation. Support Team MPS today at bit.ly/TeamMPS.

Donations to Team MPS allow us to offer additional research grants each year. Although great strides have been made, continued funding is urgently needed to accelerate research. In partnership with Penn Medicine Orphan Disease Center, more than \$310,000 has been raised within the last three years through this incredible event. Our efforts have allowed us to fund research for MPS I, MPS IIIB, MPS IIIC and ML II, but we won't stop until we find treatments and cures for all MPS/ML diseases.

There's still time to ride with Team MPS or volunteer at the event. Registration is only \$25 when you are included in our fundraising efforts. Contact Meredith Stone for more details. Can't ride or make it there to cheer us on? Follow us on social media and share with friends and family by using the hashtags #TeamMPS and #mdbr2018.
