

Do It *Fore* Dan!!

Beat MPS!

Golf tournament in Memory of Dan Miller and
everyone affected with MPS.
Raising Research Dollars and Awareness of MPS Disorders

Please join our family as we host the "Virtual" 9th Annual Do It 'Fore' Dan Golf Tournament to raise money for medical research seeking cures and treatments for the devastating disease, MPS (Mucopolysaccharidoses). This condition has affected many lives in the tri-state area and around the United States and sadly has taken the lives of many as well. There are seven different types of MPS and our son Dan, had MPS type II or Hunter Syndrome. Dan fought an incredible battle against MPS for a little over 19 years but lost the fight in January 2016. Although Dan is no longer with us, it is our hope that we can continue to raise both awareness and funds for this terrible progressive and degenerative disease.

Due to the COVID19 crisis and the safety of all the people that come out to support this event, we have decided to make the 2020 outing a virtual one. We are asking that folks play a round of golf sometime between now and October 2, 2020 and make a donation through the web site link. The round of golf can be anything from a full 18 holes on a regulation golf course to 18 holes of miniature golf! Everyone that completes a round and makes a donation of \$25 or more through the web site (<https://support.mpsocietygive.org/event/do-it-virtual-fore-dan-golf-tournament/e290004>) will receive a gift commemorating this year's virtual outing. (Please send us a picture of you playing too!) If you don't want to play a round of golf but would still like to participate, virtual full and partial hole sponsorships will also be available, and your logo/company name will be shared on social media and other forms of this year's event promotions. We hope that this will be a one-time event and that we will be able to get everyone back on the course next year in person. We cannot thank you enough for the support you have provided us and all the folks impacted with MPS and hope that you will continue to help support this cause this year

MPS is a genetic illness which causes damage to virtually every cell in the body resulting in progressive deterioration and eventually death. It is a terminal disease with no cure. The average lifespan of a child with MPS is the teen years. Although the disease is rare, there are a number of families in the tri-state area that we know who have an affected loved one or who have lost a loved one. The National MPS Society is a nonprofit 501c3 (11-2734849) organization dedicated to improving the lives of children and families who are impacted by MPS while researching for cures. Promising treatment and therapies are just around the corner. Money is needed to continue the fight to find cures. For more information about MPS and the National MPS Society, please visit www.mpsociety.org.

We are the event organizers. We are also the parents, sibling and friend of a child that lost his battle against MPS. We struggle to understand how we could be in 2020 and not have a cure or treatment for all seven types of MPS. One thing that we can do as parents to honor Dan's life is to raise awareness and funding for research. Please help us to fight for the lives of all those who live with MPS.

Sincerely and with heartfelt thanks,

Amy and Ray Miller (Dan's parents)
