

The Mission of the National MPS Society

Who We Are:

The National MPS Society exists to cure, support and advocate for MPS and ML. We provide hope and support for affected individuals and their families through research, advocacy and awareness of these devastating diseases.

Since 1974 the Society has supported individuals and families affected by MPS and ML. We are governed by a member-elected volunteer Board of Directors, many of whom are parents of children with MPS. We also benefit from the expertise of a Scientific Advisory Board, comprised of world-class physicians, researchers and medical professionals throughout the world.

How We Help:

The Society is the national support for families and children affected by MPS and ML. The Society advocates through efforts in Research, Family Assistance, Legislative Advocacy, Educational and Fundraising Committees. The Society has funded over \$11 million in research.

How You Can Help:

We need your support to help us educate others about our mission and to raise the money we need to support medical research – the key to longer, happier lives with MPS and ML.

Can't Join Us In Person? Run a Virtual 5K!

What exactly IS a Virtual 5K?

It is just like any other 5K, except the race location is wherever you are! You get to choose where, with whom, and even how you want to complete the 5K. By participating virtually, you can run the 5K at any time leading up to March 26th. It can even be done in increments - keep track of your distance until you hit the 5K.

Help Us Raise Funds and Awareness

This event is open to individuals of all ages and abilities. Once you register, either as an individual or as part of a team, you are set. We would love to see the posts of pictures participants on their 5K route. This is completely optional - but since our goal is to bring awareness to MPS and ML, we want to do just that. And by using [#RaleighRun2022](#) and [#MPSAwareness](#) on your social media posts, we will be able to keep up with the fun!

Raleigh Run for Rare 5K Run and 1 Mile Walk March 26, 2022

An In-Person and Virtual Event

**Dorothea Dix Park
805 Ruggles Drive
Raleigh, NC 27603**

7:00 AM: Packet Pickup

Raising Funds for Rare Genetic Diseases

What is MPS and ML?

Mucopolysaccharidosis (MPS) and Mucopolysaccharidoses (MPS) are genetic lysosomal storage diseases (LSD) caused by the body's inability to produce specific enzymes. Normally, the body uses enzymes to break down and recycle materials in cells. In individuals with MPS or ML the missing or insufficient enzyme prevents the proper recycling process, resulting in the storage of materials in virtually every cell of the body.
